Korol Mariia

Currently, I am actively seeking a full-time position as a Trainee Front End Developer.

✔Office ✔Remote ✔Hybrid
✖Not open to relocation

Responsible developer with one year of experience in personal projects. I have already completed Basic, Pro and React front-end courses at Hillel IT school. Currently, I'm studying TypeScript and libraries for React through various training programs.
I work on improving my English language skills daily.
My previous experience has helped me become a goal-oriented individual who can quickly adapt to new environments. I always strive to find the most efficient solutions for any given task. Ready to work in a team or independently, taking full accountability for achieving results.

- Ukrainian - Native

Education

- 2007-2012
  Mechnikov National University
  Business and Management
  Obtained a Master's degree

Pet-projects

- **Personal Website** ➡ Github | Demo
  The website is designed to be responsive and adaptable, providing visitors with comprehensive information about me. Visitors can download the resume, and a user-friendly feedback form is available for quick and easy communication. The website also features a theme-switching function.
  [ReactJS: functional components, React-router, CSS-animation, SASS, Material-UI, Netlify for DEMO and feedback]

- **NutriChef** ➡ Github | Demo
  The app utilizes the Edamam API. The NutriChef is an online platform for people interested in cooking various dishes.
  The site offers a wide database of recipes from different cuisines around the world, from classic dishes to exotic recipes.
  Each recipe includes a detailed description of the ingredients and instructions for preparation, as well as photos of the dish.
  [ReactJS: functional components, React-router, Reduxjs/toolkit, Axios, Redux-thunk, Redux-logger, React-share, Axios, Material-UI, TypeScript,Lodash, Vercel for Demo]

- **Github battle** ➡ Github | Demo
  The app utilizes the GitHub API to enable users to search for repositories by programming language or using a search bar. Additionally, the app allows users to participate in friendly "battles" with friends or other repositories by comparing popularity.
  [ReactJS: functional components, React-router, Reduxjs/toolkit, Axios, Redux-thunk, Redux-logger, Axios, Material-UI, TypeScript, Netlify for Demo]

- **MovieFinder** ➡ Github | Demo
  The app utilizes the TMDB API to enable users to search and filter movies by genre, language, and various criteria. Users can access detailed descriptions of each movie and curate their favorites list by adding or removing films.
  [ReactJS: functional components, Reduxjs/toolkit, React-router, React-hook-form, SASS, Axios, Redux-thunk, Redux-logger, Material-UI, Vercel for Demo]

- **HLegals** ➡ Github | Demo
  The Hlegals company website was created with a responsive, adaptive layout that includes five @media-queries. I worked with the design in Figma.
  [HTML, CSS/SASS, JavaScript, task manager - Gulp, Netlify for Demo]

Experience

- 2021-2022
